Re: MB Docket No. 10-56

Dear Chairman Genachowski,

Orange County is proud to be the home of Universal Studios. Undoubtedly, you will hear from representatives of its parent company, NBC Universal, during your review of the proposed Comcast-NBCU transaction. Universal is very important to our local economy, generating jobs and revenue and attracting tourists to the area.

Like NBCU, Comcast has a major presence in my state. The company is a revenue driver and respected corporate citizen. I also recognize the continued and potential benefits related to approval of this transaction. If Comcast brings the same type of dynamic change it brought to broadband to its management of NBCU, we should be confident it can sustain and improve broadcasting, local news, journalism and network television in the evolving communications marketplace.

Additionally, as chairman of our state House Energy and Utilities Policy Committee I am committed to the exploration of new energy technologies and new ways to achieve energy efficiency. Sound natural resource management is increasingly dependent upon access to and expansion of internet services. These services facilitate telecommuting, teleconferencing, business and consumer commerce and widespread distribution of information and entertainment products previously dependent on plastic, petroleum and paper.

I hope you will consider these factors in your decision making process. Approval of the Comcast-NBCU transaction is not only good for our state and its communities, but for the future of our country.

Sincerely,

A handwritten signature in blue ink, appearing to read "SP", is written over the typed name.
